

## ENTRY-LEVEL ACTUARIAL EMPLOYMENT OPPORTUNITY

Select Actuarial Services is an independent property and casualty actuarial consulting firm. We specialize in the analysis of risks retained by non-insurance entities, either through self-insurance or captive insurance company arrangements. We have an established base of long-term, satisfied clients in many fields and we expect this base to continue to grow. This growth has compelled us to look for a qualified analyst.

Select Actuarial Services is currently seeking to hire an entry-level analyst to assist us in the technical analyses required to complete our actuarial projects. Duties will include analysis of data in electronic spreadsheets, running loss modeling software, and checking exhibits for accuracy. Select Actuarial Services is prepared to offer a competitive salary, a full exam program and a comprehensive benefits package.

The qualified applicant will hold an undergraduate degree in math (candidates with degrees in other fields and a strong math background will be considered). Having credit for actuarial exams is a plus but not required. Strong verbal and written communication skills are also essential for success in a consulting environment. Computer know-how is important, with spreadsheet skills being the most valuable. Qualified applicants must be detail-oriented and capable of working in a team environment.

Select Actuarial Services offers a dynamic and unique working environment. We believe this position will give the qualified applicant an excellent opportunity to enjoy all that an actuarial career has to offer along with experiencing the fascinating world of working in an independent actuarial consulting practice.
